The Engineering Division is responsible for the creation of contracts and plans as well as the management of its town projects. The division is centered on providing support to the construction and maintenance divisions of the Department of Public Works. In general, the Engineering Division's personnel routinely complete the following:

- preparation of plans and specification
- compilation of estimates and bidding documents to create contracts
- maintaining detailed utility data
- management of construction projects involving open space and the town's public infrastructure
- performing surveys and analyzing data
- providing town plans including land, water, drain, sewer, parks, and streets to the public
